Choosing Your Electric Bike

Print-off, and take this checklist with you to an electric bike dealer when you're trying out different electric bikes. It'll help you evaluate and compare different makes and models.

The big difference you'll find most probably is that you'll prefer the feel of one or two bikes in particular. That's why we strongly suggest trying out lots of different types of electric bikes before committing to a purchase.

Compare a **hub motor** bike and a **crank-drive** bike
Compare a **throttle-assist** bike with a **pedal-assist** bike
Try riding up **at least one hill**

Checklist for Evaluating Electric Bikes

	Bike #1	Bike #2	Bike #3
What's the estimated range?			
How long is it guaranteed for?			
Are Spares in the Country?			
Is there space for storage, or panniers?			
Is it easily adjustable?			
Does it weigh much? Can you lift it?			
What's the replacement cost of the battery?			
How much does it cost brand new?
